## Introduction

Apart from the expertise in IT and HR Services, Triad Infotech has a Specialized Training wing which provides customized training programs to the corporate. With the mix of experience and energy in this area, Triad Infotech's programs offer rich content in the most contemporary fashion.

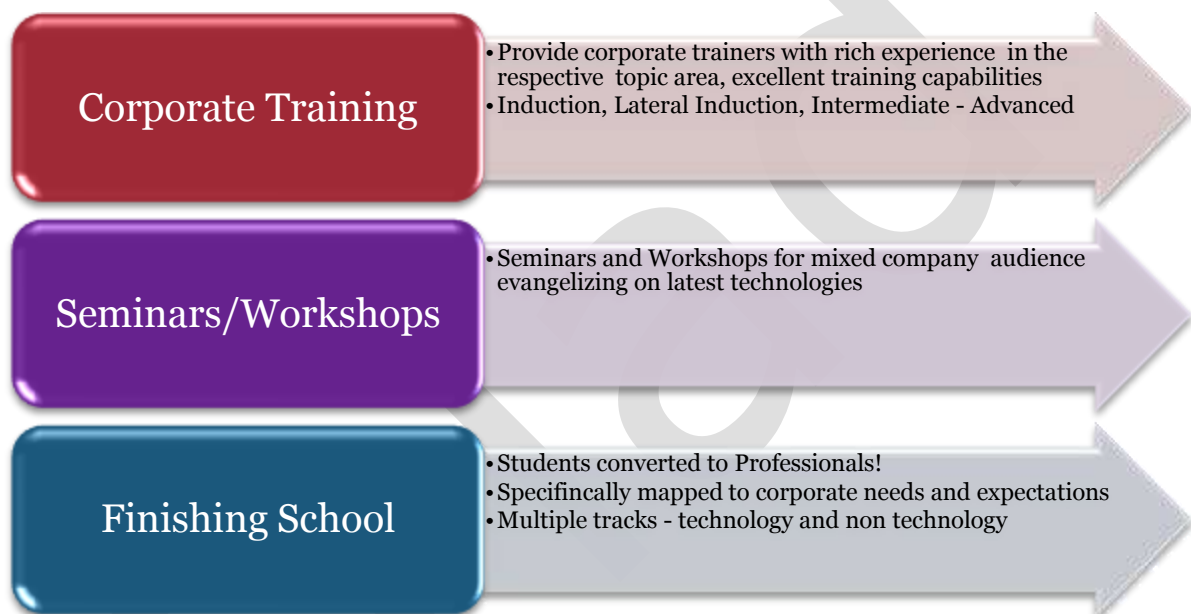

With the support from our IT Solutions wing, we have made the best use of technology to meet the high expectations from customers. We have developed a Recruitment Management Software (RMS), which manages our recruitment database and allow easy access of right CV's, thus serving clients swiftly and efficiently.

## Experience outline:

- Conducted Technology and Personality Development Programs for a number of organizations

- Conducted Technology training programs on .NET, J2EE, SQL Server, Oracle, Project Management, Project Management Tools, Data Warehousing etc. for many leading IT companies in India and abroad.
- Conducted personality development training programs with prestigious organizations.
- We also conduct technical training programs in ERP (Enterprise Resource Planning), SAP, Microsoft .NET, Software Testing
- We do HR Consultancy for some of the premier organizations in the country. We have placed skilled candidates with companies in Chennai, Bangalore, Mumbai, and Delhi. We also have tie ups with HR consulting organizations in US, UAE, Singapore, Malaysia and Australia to place people on a regular basis.

## Types of Programs

## Pedagogy

"We don't train. We enlighten."

### Highlights

- Activity Based
- Exercises
- Participative and Interactive: Communicative Approach
- Proficiency & Competence Oriented

With a blend of skill and experience and through the number of training programs conducted already, we now follow some of the best practices in the specialized training sector. We always believe our programs should not just train the participants but it should leave them enlightened.

The trainers not only educate the concepts but also exchange practical experiences with the participants thus making them realize the value and importance of each of the concepts. This will make them follow it for lifetime.

Though our core curriculum is fixed, we prudently review and redesign it according to the client's requirements and the target audience, every time we conduct a workshop. Thus, it will precisely confirm to the needs of the target group.

We use PowerPoint presentations and videos to support the trainer's lecture. This will also provide better clarity and understanding to the participants. The whole course is meticulously planned and converted onto PowerPoint slides ahead of the workshop. We have professional designers who develop slides of greater visual impact.

For technology programs, examples covering all scenarios are developed and shown. It will also be distributed to the participants. Many additional tools and related topics as required will also be taught to develop complete IT professionals.

Role play techniques will also be used wherever necessary to make the participants experience these aspects as they occur in real life scenarios. Participative techniques and group discussions will also be used as and when required.

Last but not the least, feedback from participants will be sought for improvement.

---

### *Trainers*

---

Our trainers are rich in experience with great flair for teaching. They have had wide experience in the corporate world and have come through variety of scenarios. They have handled workshops for many of our corporate clients. Participants and companies have acknowledged the teaching abilities and have felt a real change after the programs.
